

1. Start here

- Start at <http://agweather.mesonet.org/>
- Go to the "Downloads" section
- Select "Download for Mac" if you have a Macintosh computer. If you have a Windows machine, see page 1 of these instructions for guidance
- If you need additional help, call (405) 325-3231 or e-mail operator@operations.mesonet.org

2. Download window

- The next window will show you that the computer is downloading a program
- The Downloads window will remain open until you close it

3. Install WeatherScope

- The WeatherScope Installer will appear next
- The Installer will lead you through the rest of the process
- After reading the introduction on the Installer, select the "Continue" button

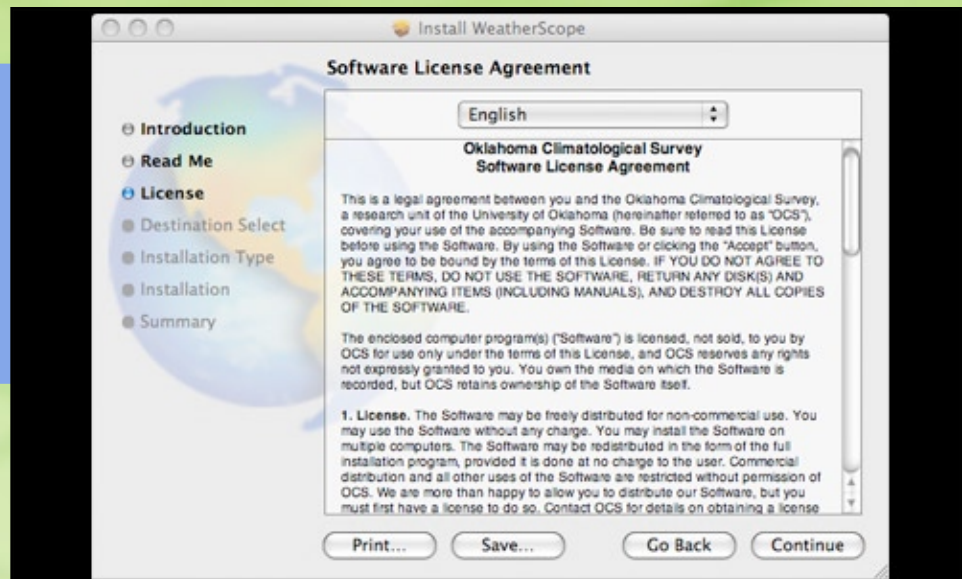

4. Read me

- Next, the Installer will display Important Information
- You have the option to save or print this material
- After reading the Important Information, select "Continue"

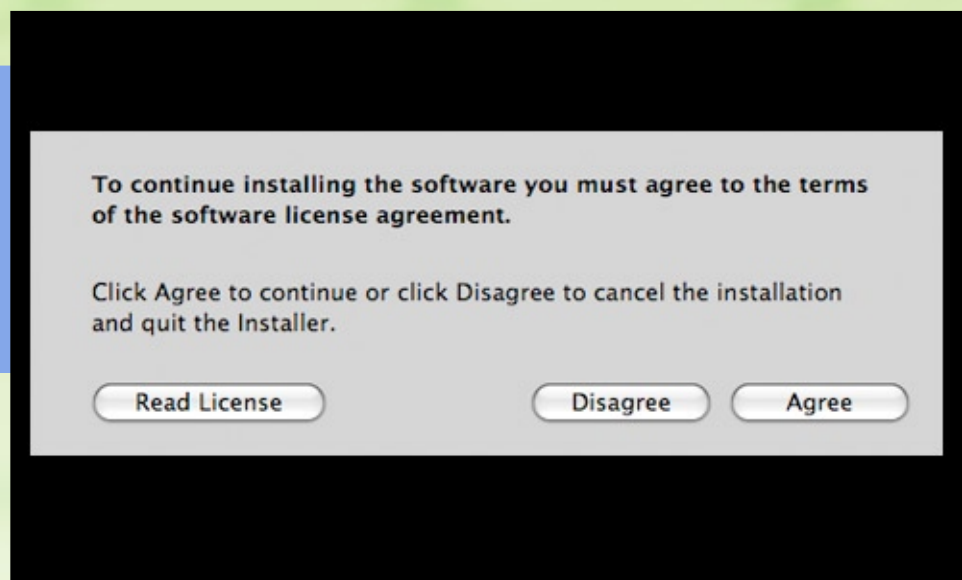

5. License agreement

- Next, the Software License Agreement will appear
- This window allows you to read and print the WeatherScope License Agreement
- In summary, you agree not to tamper with, sell, or commercially redistribute this software
- Select "Yes" to continue with the installation

6. Agree or disagree

- To continue with the installation, you must agree or disagree to the Software Licensing Agreement
- You will be prompted to do this by a new window that appears
- If you agree with the terms, select the "Agree" button
- This will continue the installation process

7. Installation location

- You then will be asked to chose a destination for the WeatherScope software
- The Installer automatically plans to install the software on your hard drive
- To change the install location, click the “Change Install Location...”
- Select your preferred install location

8. Installation complete

- When installation is complete the Finished window will appear
- Select “Close” to close this window and end the WeatherScope software installation
- If you need additional help, call (405) 325-3231 or e-mail operator@operations.mesonet.org
